Pirana

The flexible modeling environment for NONMEM

Quick Guide: Making VPC's with PsN and Xpose

Scope

This Pirana Quick Guide explains how to use Pirana to generate VPC data using PsN, and how to subsequently use that data to create plots in VPC using different several plotting options.

Generating data for the VPC

This is done in PsN...

Plotting the VPC data

From Pirana, start the Xpose interface...

Tweaking the VPC plot

The standard VPC plot in Xpose is usually not the best looking VPC that can be made.
